CYCLINGWEAR
COLLECTION

RUDY PROJECT®
Technically Cool

CYCLINGWEAR

We present the exclusive 2017 Rudy Project Cyclingwear collection powered by Ftech.

Rudy Project believe, that having a wide offer of Technically Cool cycling clothing made from only the finest selection of materials, hand made in Italy by custom cycling clothing experts, will help to build stronger relationships and complement the line of Rudy Project's premium products and services.

Rudy Project has chosen Ftech, a true Italian custom cycling clothing specialist, to develop a high end cycling clothing collection, that will satisfy all cyclist's needs.

FTECH SHIELD ENDURANCE

High performance LYCRA® compression technology with a composition of 80% Polyester and 20% Elastane. LYCRA® Sport certified. Strong, elastic permeable knit. Providing perfect fit on the body and unrestrained movement.

FTECH RIVIERA

Innovative high-performance Xtra life LYCRA® specific for shape wear. A soft feel brings maximum comfort and extreme freedom of movement. LYCRA® Sport certified. Reducing muscle vibration and supporting you to reduce muscle fatigue, boosting your athletic performance. Excellent breathability and quick drying. Extreme mechanical properties make this fabric long lasting. Xtra life LYCRA® ensures a high resistance to chlorine, oil and perspiration. High shape retention power and, resistance to pilling, plus protection from abrasion and UV rays (UPV 50+).

BIBSHORTS

SHORTS

SUPERGRIPPER Single layer elastic grip band made from polyester microfiber. Patterned Silicone gripper with soft touch on the skin keeps the garment firmly in place. Placed on the leg cuffs of bib shorts it distributes the pressure evenly. Designed to fit your leg and follow your movements.

MESH Stretch mesh straps bringing elasticity and controlled stretch for better movement. The composition of polyester and LYCRA® allows a comfort fit and support with improved ventilation and breathability.

THE CHAMOIS

ELASTIC INTERFACE
THE PERFORMANCE SPECIALIST

ENDURANCE 2.5 HD MEN

This pad belongs to the segment of the Endurance pads and uses the "stitched" technology. Endurance 2.5 HD offered a more anatomical fit and improved protection throughout the pelvic tract. Very high density foams are applied under the top layer to deliver maximum performance on long distance rides.

ENDURANCE 2 WOMAN

Endurance 2 Women's pad has a central protective insert specially refined with a smaller and more accurate protective area. This pad has been developed with generation of high density foams which provide excellent protection for long distance rides and a great fit designed just for women cyclist. Besides, EIT X-Tract fabric has a double layer structure which helps collect and expel moisture. The perforated base layer provides increased breathability and quick dry.

SUPER TRI S M L

EIT Super - Tri pads have a special design developed to provide maximum performance and comfort for multi-sport athletes. Our perforated short insert with high density foam, provides maximum protection with a slim profile. Plus, EIT Super - Tri pads with all-way stretch fabric platform guarantee total freedom of movement and excellent fit. To meet the needs of the wide range of multi-sport athletes.

Ftech cycling pads are exclusively powered by Elastic Interface® Technology: the original elastic pad technology for cycling shorts, developed after extensive R&D, for the most comfortable cycling shorts ever.

FABRIC TECHNOLOGY

FTECH AIRFIT - "Pro" jersey

Extremely technical and lightweight fabric made from polyester microfiber with multidimensional elasticity and breathability. Comfortable stretch and aerodynamic fit make this fabric feel like a second skin on your body, following your movements and enhancing your performance.

FTECH MESH - "Pro" jersey

Perforated fabric bringing elasticity and controlled stretch for better movement. The composition of polyester and LYCRA® allows an aerodynamic fit and feels like a second skin on your body. The perforation of the material applied in the jersey side panels and sleeves allows humidity to be expelled immediately, offering the maximum comfort.

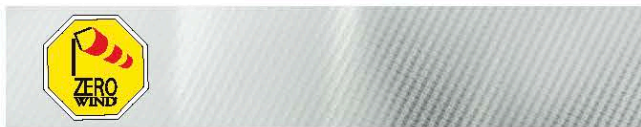

FTECH SHIELD ENDURANCE - bib

High performance LYCRA® compression technology with a composition of 80% Polyester and 20% Elastane. LYCRA® Sport certified. Strong, elastic permeable knit. Providing perfect fit on the body and unrestrained movement.

FTECH RIVIERA - bib

Innovative high-performance Xtra Life LYCRA® specific for shape wear. A soft feel brings maximum comfort and extreme freedom of movement. LYCRA® Sport certified. Reducing muscle vibration and supporting you to reduce muscle fatigue, boosting your athletic performance. Excellent breathability and quick drying. Extreme mechanical properties make this fabric long lasting. Xtra Life LYCRA® ensures a high resistance to chlorine, oil and perspiration. High shape retention power and, resistance to pilling, plus protection from abrasion and UV rays (UPV 50+).

FTECH WINDY - Windjacket/Vest

Windy® is a two-layered fabric which features ZeroWind® hydrophilic membrane, a material known for its dynamic breathability and maintaining a high level of protection from wind and rain. Being lightweight and ensuring a high-level of performance- this is the ideal fabric for manufacturing rain jackets or protective vests suitable for many outdoor sports such as cycling, running, etc. as it's super light and also easy to stow.

FTECH VUELTA - bib/tights

Innovative and elegant performance fabric made of micro polyamide with soft thermo fleece insert. Providing perfect fit and feel on the body for colder riding conditions. Unrestrained movement and thermo-regulation will keep you comfortable and warm at all times.

FTECH HYDROFIT - "Team" jersey

Lightweight polyester fabric that serves to keep your skin dry, transporting humidity away from the body. The 3D interlock weave reduces the skin contact and dries almost instantly. Classic jersey fabric with hydrophilic treatment keeps you dry on your ride and provides you with comfortable stretch and aerodynamic fit.

FTECH SUPERGRIP - bib

Single layer elastic grip band made from polyester microfiber. Patterned Silicone gripper with soft touch on the skin keeps the garment firmly in place. Placed on the leg cuffs of bib shorts it distributes the pressure evenly. Designed to fit your leg and follow your movements.

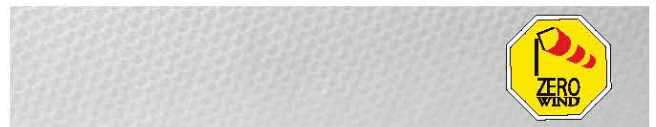

FTECH MESH - bib mesh straps

Stretch mesh straps bringing elasticity and controlled stretch for better movement. The composition of polyester and LYCRA® allows a comfort fit and support with improved ventilation and breathability.

FTECH REVOLUTIONAL - "Tri" kit

Patented high-performance LYCRA® Xtra Life fabric. Extremely light, cutting edge fabric for the most challenging sport activities. Being ultra-thin, the FTECH REVOLUTIONAL is 50% thinner than standard fabrics and it fits the body like a second skin. A soft feel brings maximum comfort and extreme freedom of movement. LYCRA® Sport certified, boosting your athletic performance. Excellent breathability and quick drying. Extreme mechanical properties make this fabric long lasting. LYCRA® Xtra Life ensures a high resistance to chlorine, oil and perspiration. High shape retention power and, resistance to pilling, plus protection from abrasion and UV rays (UPV 50+).

FTECH ZERO WIND - NEW TREVALLI

It is a three-layer, fully tested fabric. Between two fabric layers there is the breathable ZeroWind® membrane, which acts as a barrier to wind and rain. Its dynamic breathability feature allows evaporation from the inside, but keeps rain and wind outside. This fabric is perfect for the creation of rain jackets or protective vests that should be used during mid-season (spring/fall) or with mild temperatures around 10/15° C. Customization options are available on this fabric with dysublimation printing.

FTECH ZERO WIND - SOFFIO PLUS

Its three layers combined with the ZeroWind® membrane make this a fabric suitable for the winter season, to be used in cold weather conditions (5°C to 10/12° C). The internal part of the fabric allows evaporation from the inside, but keeps rain and wind outside. Both fabric and membrane are stretchable enough to allow the creation of fitted sportswear.
